Mitchiner, Dr. M. Indo-Greek and Indo-Scythian Coinage. 9 volumes:

This is the most important numismatic work ever published on Indo-Greek and Scythian coinage and an unprecedented amount of information has been gathered together from many sources. Ten thousand photographs illustrate the history of coinage in Afghanistan and Pakistan during the five centuries that elapsed from the coming of Greek culture with Alexander the Great in 330 B.C. until the foundation of the Sassanian Empire by Ardeshir in A.D. 226.

Many coins are illustrated for the first time and numerous hitherto unrecorded issues are presented; a full description of each issue being placed alongside the relevant photographs. The wealth of new material has enabled Dr. Mitchiner to draw many new conclusions about the history of this region. These are contained in an easily read text that is amplified by numerous maps and tables. This presentation of a particularly interesting period in Greek and Indian history should be of considerable interest to collectors, historians and archaeologists alike.

Mitchiner, Dr. M. Indo-Greek and Indo-Scythian Coinage. 9 volumes:

This is the most important numismatic work ever published on Indo-Greek and Scythian coinage and an unprecedented amount of information has been gathered together from many sources. Ten thousand photographs illustrate the history of coinage in Afghanistan and Pakistan during the five centuries that elapsed from the coming of Greek culture with Alexander the Great in 330 B.C. until the foundation of the Sassanian Empire by Ardeshir in A.D. 226.

Many coins are illustrated for the first time and numerous hitherto unrecorded issues are presented; a full description of each issue being placed alongside the relevant photographs. The wealth of new material has enabled Dr. Mitchiner to draw many new conclusions about the history of this region. These are contained in an easily read text that is amplified by numerous maps and tables. This presentation of a particularly interesting period in Greek and Indian history should be of considerable interest to collectors, historians and archaeologists alike.

Corpus Nummorum Romanorum

A Banti and L. Simonetti. *A general catalogue illustrating the Roman Imperial series.*

A valuable feature of this partly bilingual work for both student and collector is the wealth of photographic illustrations contained in its text, these being drawn from dealer's lists and sale catalogues, as well as from museum collections for some of the more important pieces. The text is in Italian, with historical notes in English.

The arrangement adopted by the authors make this work quick and easy to use for even the quite inexperienced collector. There is also a list of valuations at the end of each volume compiled from auctions and dealer's lists from the past twenty years.
